Powering Progress Through Engineering Excellence

Bravon Technical Services is a Karachi-based engineering solutions provider specialising in high-quality Mechanical, Electrical, and Plumbing (MEP) services, Industrial Contracting, Instrumentation & Controls, and Renewable Energy Systems.

Founded by a team of expert engineers, Bravon is driven by innovation, reliability, and a passion for excellence in every project we undertake – combining technical expertise with disciplined project execution to deliver results that last.

"Our foundation is built on technical expertise and a commitment to delivering reliable, future-proof solutions for our clients."

What We Deliver

A comprehensive suite of engineering services built for industrial and commercial operations — designed to keep critical systems running smoothly, efficiently, and sustainably from design through commissioning.

01 MEP — Mechanical, Electrical & Plumbing Complete design, installation, and maintenance of essential building and industrial systems.	02 Instrumentation & Controls Advanced automation and control systems that enhance process reliability, accuracy, and productivity.	03 Contracting Turnkey contracting from design to commissioning — electrical, civil, and mechanical works.
04 Erection & Maintenance Expert installation and maintenance for industrial and commercial facilities ensuring long-term reliability.	05 Solar Power Systems Sustainable solar design and installation for residential, commercial, and industrial clients.	06 CCTV & Security Systems Modern surveillance and access control for 24/7 security in homes, offices, and industrial sites.

MEP Excellence

Bravon Technical Services offers complete MEP solutions, covering the design, installation, and maintenance of systems for both industrial and commercial projects. We ensure all systems are energy-efficient, safe, and compliant with international standards.

→ Electrical Systems

Design, wiring, and load management for industrial and commercial facilities.

→ HVAC

Installation and ducting for climate control systems.

→ Plumbing

Water supply and drainage systems engineered for reliability.

→ Safety

Firefighting systems and safety installations to code.

ELECTRICAL PANEL INSTALLATION — SITE WORKS

FABRICATED PUMP SKID ASSEMBLY

Renewable Energy — Embracing Solar Power

As part of our renewable energy initiative, Bravon delivers solar system design and installation services that promote sustainability. We help clients reduce energy costs while supporting green energy adoption across Pakistan.

→ Residential, Commercial & Industrial Solutions

Tailored solar setups for every scale of operation.

→ On-Grid & Hybrid System Setups

Flexible solutions for connecting to the main grid or operating independently.

→ Battery Backup & Inverter Installations

Ensuring reliable power even during outages.

→ Energy Audits & Load Assessments

Optimising system size for maximum efficiency and savings.

ROOFTOP SOLAR INSTALLATION — KARACHI

SOLAR MOUNTING STRUCTURE — SITE ERECTION

Specialized Industrial Services

Beyond core MEP, Bravon offers highly specialised services critical for heavy industry and plant operations.

01 Boiler Engineering & Certification

A-Class certified boiler operations, inspections, and compliance assurance. Safety audits and performance optimisation for industrial boilers.

02 Industrial Plant Fabrication

Custom fabrication of pressure vessels, pipelines, and structural components. Welding and metalwork aligned with international standards.

03 Erection & Commissioning

End-to-end erection of industrial plants and mechanical systems. On-site supervision and quality control during installation phases.

04 Maintenance & Overhaul Services

Preventive and corrective maintenance of boilers and mechanical systems. Emergency repair and troubleshooting for plant machinery.

Driving Excellence

Our leadership team combines deep technical knowledge with extensive practical experience, ensuring every project meets the highest standards.

CHIEF EXECUTIVE

AZ

Engr. Atif Zaeem

CHIEF EXECUTIVE OFFICER

M.E Industrial & Manufacturing Management (NED)

B.E Electrical (SSUET)

Extensive experience in industrial project execution, system design, maintenance, and plant operations. His leadership ensures Bravon's technical excellence and customer satisfaction.

PARTNER

QS

Syed Qasim Ali Shah

PARTNER

A-Class Certified Boiler Engineer

Industrial Fabrication & Erection Specialist

Expertise in fabrication, erection, and maintenance of industrial plants. His practical knowledge and commitment to quality drive the company's operational success.

Vision & Mission

We are focused on delivering high-value technical solutions that combine innovation, safety, and cost-effectiveness while building long-term partnerships with our clients.

VISION

To be a recognised leader in engineering, renewable energy, and automation services across Pakistan.

MISSION

Deliver high-value technical solutions that combine innovation, safety, and cost-effectiveness while building long-term partnerships with our clients.

Key Industrial Projects

Bravon Technical Services has successfully delivered numerous industrial and commercial projects — from solar installations to MEP infrastructure to facility maintenance — supporting leading clients across manufacturing, pharmaceuticals, energy, and construction sectors.

Your Partner for the Future

01 Experienced Engineering Team

02 Commitment to Quality & Safety

03 Timely Project Delivery

04 Innovative & Sustainable Solutions

05 Comprehensive After-Sales Support

Let's Build the Future Together.

For inquiries, partnerships, or project discussions — our engineering team is ready to scope your next project.
